

3M™ Disposable Respirator 8710, P1

The 3M™ Disposable Respirator 8710 P1 provides lightweight, comfortable respiratory protection against dusts and mists.

Features

- P1 rated filter to AS/NZS1716.
- Lightweight construction promotes greater comfort and contributes to increased wear time.
- The cupped shape, twin strap design and adjustable steel nose clip provides a custom fit with fewer pressure points and a secure face seal over a range of face sizes.
- Kraton headband for comfort and durability.
- For use against mechanically generated particulates, dusts and mists.
- All filter design provides economical protection with no cleaning required or spare parts to maintain.

Time Use Limitation:

- If the respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and replace and refit the respirator.

Specifications

- Weight: ~10g per respirator.
- Meets performance requirements of AS/NZS1716.

Applications

- Mining
- Woodwork, Sawmills
- Construction
- Grain Handling

Materials:

The following materials are used in this product:

3M™ Disposable Respirator 8710, P1

1. Cup the respirator in your hand with the nosepiece at your fingertips allowing the headbands to hang freely below your hand.

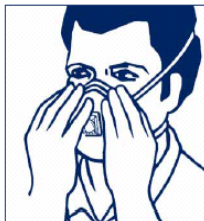

2. Position the respirator under your chin with the nosepiece up.

3. Pull the top strap over your head resting high at the top back of the head. Pull the bottom strap over your head and position it around the neck below the ears.

4. Place the finger tips of both hands at the top of the metal nosepiece. Mould the nosepiece to shape of your nose by pushing inwards while moving your fingertips down both sides of the nosepiece. Pinching the nosepiece using one hand may result in less effective respirator performance.

5. The seal of the respirator on the face should be fit-checked prior to wearing in the work area.

- Cover the front of the respirator with both hands, being careful not to disturb the position of the respirator.
- Inhale sharply. A negative pressure should be felt inside the respirator. If any leakage is detected adjust the position of the respirator and/or tension of the strap.

Retest the seal. Repeat the procedure until the respirator is sealed properly.

WARNING!

- Respirators must not be used until your employer has determined whether usage will be in accordance with manufacturers instructions.
- The wearer must be trained in the proper fitting and use of this product.
- Failure to follow all instructions and warnings on the use of this product and/or failure to wear this respirator during all times of exposure can reduce respirator effectiveness and result in illness or death.
- All respirators should be used in accordance with Australian Standard AS/NZS 1715.
- It is recommended that fit testing be conducted before assigning a respirator to an individual. If you cannot achieve a proper fit, do not enter contaminated areas.
- Do not use with beards or other facial hair or conditions that prevent a good seal between the face and the sealing surface of the respirator.
